suriyaprakasha489@gmail.com | 6374688675 | Coimbatore, India | GitHub | LinkedIn

SUMMARY

Results-oriented Data Science and AI graduate with hands-on experience in machine learning, deep learning, LLM-powered agentic systems, and full-stack development. Demonstrated ability to architect end-to-end AI pipelines — from multi-agent workflows and RAG systems to real-time voice agents and competitive analytics platforms. Proficient in Python, FastAPI, LangChain, and LangGraph, with a strong foundation in backend engineering using MongoDB and MySQL. Seeking a role in AI engineering or data-driven product development to deliver measurable business impact.

EDUCATION

Amrita Vishwa Vidyapeetham

Integrated M.Sc. · Data Science · Coimbatore

Sep 2022 – Present

CGPA: 7.62 / 10

EXPERIENCE

Data Scientist Intern · HELYXON Healthcare Solutions Pvt. Ltd.

Apr 2025 – Jun 2025

Remote

- Engineered an AI-powered Resume Analyzer using LLMs, LangChain, and LangGraph, increasing candidate screening accuracy by ~35%.
- Automated the end-to-end candidate evaluation workflow, cutting manual review time by over 50%.
- Constructed a scalable pipeline capable of processing 200+ resumes per day during load testing.
- Optimised agent coordination logic, reducing model error rates by ~40%.
- Collaborated with the R&D team to refine prompt structures, improving overall system stability by 30%.

PROJECTS

AI-Driven Multi-Agent System for Automated Business Data Analysis

Jan 2026 – Present

Python, LLMs, LangChain, LangGraph, ANOVA, t-test, Chi-square, Data Visualisation

- Architected a modular multi-agent workflow that translates natural-language business queries into fully structured statistical analysis pipelines.
- Integrated ANOVA, t-test, and Chi-square hypothesis tests to surface data-driven insights automatically.
- Generated visual summaries that improved decision-making speed for business intelligence teams.

Maneuver: AI-Powered Multimodal Voice Agent for Discovery Calls

Present

Python, React.js, TypeScript, LiveKit, Groq, Cartesia, WebRTC, Whisper, Silero VAD | Conversational AI

- Built a low-latency multimodal voice agent that conducts autonomous discovery calls with real-time frontend updates via RPC-based communication.
- Integrated Groq LLMs, Whisper STT, Cartesia TTS, and Silero VAD with optimised endpointing and preemptive response generation to achieve near-real-time conversational performance.
- Implemented dynamic lead-capture pipelines, automated HTML email reporting, and backend tool-calling workflows for intelligent customer interaction and post-call analytics.

Video Benchmark Intelligence: Competitive YouTube Analytics Platform

Apr 2026 – May 2026

Next.js, TypeScript, React, Recharts, Zod, Axios, Cheerio, pptxgenjs | Competitive Intelligence

- Built a full-stack platform that discovers competitor YouTube channels, extracts public metrics, and generates weighted benchmark scores across subscribers, engagement, and posting consistency.
- Engineered a dual-path data pipeline using the YouTube Data API v3 with automatic HTML-scraping fallback, ensuring reliable extraction without mandatory API credentials.
- Implemented a content strategy classifier and gap analysis engine that categorises brand content into 10 types and surfaces whitespace opportunities across competitors.
- Delivered a client-ready PowerPoint export system generating a 13-slide professional deck with charts, rankings, and strategic recommendations.

SmartSplit: Web-Based Expense Tracking & Settlement System

Present

React.js, Node.js, Express.js, MySQL, Prisma ORM | Financial Technology

- Developed a full-stack platform for personal and group expense management with Google OAuth authentication.
- Integrated a transaction-minimisation algorithm that reduced settlement complexity for multi-party groups.
- Introduced analytics dashboards to visualise monthly spending trends and category-wise breakdowns.

ACHIEVEMENTS

24-Hour Hackathon Participant · CodeOClock

Sep 2025

- Engineered a full-stack distributor onboarding platform using FastAPI and Firebase Firestore, incorporating an automated Zapier-DocuSign workflow for contract handling, access provisioning, progress tracking, and reminders – minimising manual intervention throughout.

SKILLS

Languages & Frameworks	Python, SQL, FastAPI, React.js
AI & ML	Machine Learning, Deep Learning, NLP, LLMs, RAG, Feature Engineering
Agentic AI	LangChain, LangGraph, Multi-Agent Systems, Prompt Engineering
Libraries	TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn
Databases	MySQL, MongoDB
Data Engineering	Feature Engineering, Data Visualisation, Data Pipelining
Tools	Tableau, Jupyter Notebook, GitHub, VS Code, Excel
Soft Skills	Problem Solving, Team Collaboration, Analytical Thinking, Adaptability
Languages	Tamil (Native), English (Professional), Malayalam (Basic)
